DETAILED ACTION

Election/Restrictions

1. Applicant's election of Invention of Embodiment 1, Figure 1, in Paper No. 8 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Applicant's election without traverse of Embodiment 1, Figure 1 in Paper No. 8 is acknowledged.

Information Disclosure Statement

2. The information disclosure statement filed 11/30/01 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

Specification

3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Objections

4. Claims 2 and 4-20 are objected to because of the following informalities: In claims 2 and 4-20, line 1, "A" should be changed to "The" for clarity. Appropriate correction is required.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim 1 is rejected under 35 U.S.C. 102(a) as being anticipated by Imasu et al. (PN 6,208,525).

Imasu et al. discloses, as shown in Figure 2, a multi-chip module including semiconductor devices (10, 20) and a wiring substrate (2) for mounting the semiconductor devices, wherein

the wiring substrate comprises a first substrate (2) having through holes, a first wiring layer (2A,4A) formed on one surface of the first substrate and having first wirings (2A,4A) and a first insulating layer (3), a second wiring layer (2B) formed on the other surface of the first substrate and having second wirings (2B) and a second insulation layer (6), in which the heat expansion coefficient is different between the first wiring layer and the second wiring layer.

[Col. 17, lines 14 – 46]

Allowable Subject Matter

6. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Claims 3-20 are allowed.

8. The following is an examiner's statement of reasons for allowance:

Applicant's claims 2-20 are allowable over the references of record because none of these references disclose or can be combined to yield the claimed multi-chip module in which the heat expansion coefficient of the second wiring layer is close to the heat expansion coefficient of a mounting substrate for mounting the wiring substrate, in combination with the remaining claimed limitations.
